

Perfectus has created a very close integration with Interwoven. By fully integrating into our design tool, the IP Manager, authors are able to leverage all the power of a full document management system.

Our integration points include:

- Ability to Open and Save IPManager interview design files in Interwoven.
- Ability to Import and Export Microsoft Word templates into the IPManager designer from Interwoven.
 - Provides the ability for an Interview Designer to store document clauses (fragments) in Interwoven along with rules on how these clauses will be used in assembled documents.
 - A fetcher for extracting any files required during the document assembly process from Interwoven.
- Ability to set meta-data and distribute documents generated by Perfectus into Interwoven.
